### ADVANCED DELIVERY TECHNOLOGY

The only products you will see come to market under the Vasayo name are products that deliver results using our non-GMO liposomes and micronutrient encapsulation technology. Our liposomes are double-layered “bubbles” or spheres that surround nutrients, helping them to pass

through the harsh environment of the digestive system intact for better absorption and use by the body. The result? Premium quality products designed to maximize results and minimize waste!\*

Our mission is to deliver solutions to health-conscious consumers who demand superior quality

and delivery of key ingredients for optimal product performance. Utilizing the latest technology, Vasayo addresses common problems with extraordinary solutions.

With Vasayo, the difference is in the delivery...and that makes all the difference!
